Classic Leather Giftionery
quality never goes out of style

AAAA Grade Leather Giftionery

Leather Source

Head And Shoulders

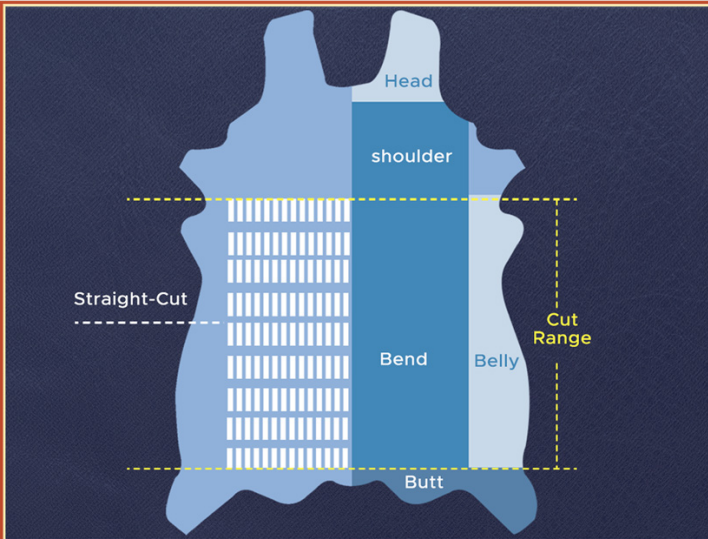

There are many lines, the fibers are soft and rough, and the hardness is not high

Heel Belly

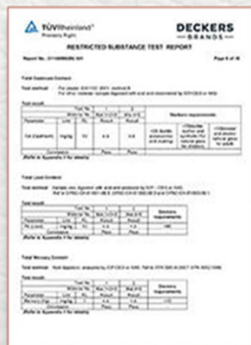

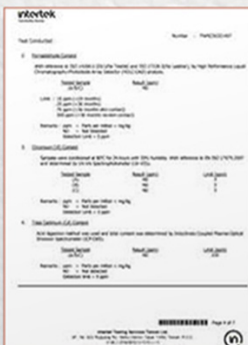

It is elastic and soft, but the thickness is different and the fibers are loose and there are many insect patterns.

Back Leather

Thick and solid skin, high fiber density, good quality and high durability

At Chen Tong, we insist on cutting our cowhides from heads to hindquarters, going with their natural fiber grains. Areas such as belly and heads tend to consist of loose fiber, so we discard a great proportion of these parts to offer the best leather that is the back part.
